FLT Group offers bearings and parts, produced in bearings factory in Kraśnik and in many factories in China, mainly to following industries:

- automotive - bearings to wheels of passengers cars, driving shafts supports, differential gearboxes, axle shafts supports, main wheels of trailers and semitrailers,
- agriculture - self aligning and Y-bearings, tapered roller bearings, deep groove ball bearings
- electric motors - ball bearings with low noise level,
- iron and steel and heavy industry - in all applications requiring high load carrying capacity

We also provide the following services

- monitor needs for new designs and varieties, and implementing production of the economically reasonable series,
- deal with providing with metallurgical other products for bearings production,
- offer technical advisory, calculation, analysis, gearbox simulation and bearings design with Romax technology,
- we possess a measuring laboratory with basic equipment for quality samples assessment and their conformity with ISO standards
